

Peridex or Periogard

Home Care instructions for the use of Peridex or Periogard:
Chlorhexadine Gluconate .02%

- This is a prescription medicament for the use of tissue irritation or trauma
- Before going to bed, brush, floss and waterpik as prescribed, then apply Peridex
- For isolated tissue irritation, pour the liquid into the cap and dab with Q-tip or brush into affected area. If prescribed for generalized use, then consult with Dr. Parizadeh or Dr. Hsu
- Spit excess out but do NOT rinse with water or mouthwash
- Leave on tissue for 2 hours before brushing in order for the Peridex to be useful
- Continue to use every day as recommended by Dr. Parizadeh or Dr. Hsu
- If you have any questions or concerns, please contact our office at 410.730.7485
