

Post-Op Instructions for Implant Crown Insert

Home care Instructions for Implant crown placement:

- Congratulations on your new crown!
- Continue to brush twice a day, floss, soft picks, and Waterpik as instructed
 - Make sure to floss below the gum tissue on your implant crown as instructed, every day
 - Gum tissue should appear pink and not bleed when flossing or brushing
- Continue to use your Peridex or Periogard rinse for 1 more week.
- You may use your implant crown as you would your regular tooth keeping in mind that some foods like hard pretzels (Hanover type) can chip the porcelain crown
- **If there are any questions or concerns, please contact our office at 410.730.7485**
