

Post-Op N2O

Home care instructions after use of Nitrous Oxide (laughing gas):

- Nitrous Oxide is an inhaled analgesic gas that does not metabolize and is exhaled from your system immediately
- You may feel mildly sleepy for a short time after the administration of Nitrous Oxide is completed, but will not have any long term affects
- You may drive and return to work normally today
- Please follow all home care instructions for your treatment that you received today
- **If you have any question or concerns, please contact us immediately at 410.730.7485**
